SUMMARY

Remote-first Full Stack Engineer with over 4 years of experience building secure, high-performance applications and SaaS platforms using Java, Spring Boot, React, and TypeScript. Proven track record in scaling production systems, implementing robust auth/RBAC models, and ensuring data traceability. Highly adaptable engineer with a strong interest in AI-powered software, LLM integrations, and modern developer tools. Eager to continuously learn, tackle complex architecture challenges, and collaborate with team-first engineering groups.

WORK EXPERIENCE

Software Engineer, Surge

Jul 2022 – Present | Remote

- Joined as an early hire and led full-stack engineering, accelerating product launches by 30%.
- Launched 3 production platforms from 0 to 1, supporting a leading EU fashion sustainability position.
- Implemented Hyperledger blockchain integration, ensuring full traceability of records across platform workflows.
- Built authentication, RBAC, and third-party integrations, achieving 40% efficiency gains.

Software Engineer, Invoice Ninja

Feb 2022 – Jul 2022 | Remote

- Rewrote the application from Flutter to React, increasing performance by 50%.
- Delivered Laravel and React features that improved scalability while maintaining high code quality.

Software Engineer Intern, BITConex

Dec 2021 – Feb 2022 | Sarajevo, Hybrid

- Shipped and maintained production code for a major German telecommunications client at scale.
- Authored technical documentation that improved maintainability and team onboarding.

EDUCATION

B.S. Telecommunications Engineering

2020 – Present

Univerzity of Tuzla, BiH
